

Improving Care for People With Cancer

Anne Arundel Medical Center's DeCesaris Cancer Institute is one of only six programs in the nation to receive a 2014 ACCC Innovator Award from the Association of Community Cancer Centers.

AAMC was selected for its symptom management clinic. The clinic gives cancer patients rapid access to treatment and coordination of care with their oncologists, nurses and support team. As a result, patients with cancer are experiencing fewer hospital readmissions and fewer emergency room visits and are happier with their care. Learn more at askAAMC.org/Cancer.

LIVING HEALTHIER TOGETHER.
