

OCM COLLABORATIVE WORKSHOP

Oncology Care Model Collaborative Workshop

During the **ACCC 43rd Annual Meeting, CANCERSCAPE**, a number of participants in the Center for Medicare and Medicaid Innovation (CMMI) Oncology Care Model program came together for the Oncology Care Model Collaborative Workshop. This ACCC event was designed exclusively for providers participating in the Oncology Care Model pilot. The workshop provided a unique opportunity for these OCM practices to collaborate in peer-to-peer learning, sharing both challenges and successes to date in their OCM journey. Read highlights in *Going the Distance: What We Heard at the OCM Workshop* [here](#).

All OCM-participating practices are invited to join the **ACCC OCM Collaborative**. Learn more about this peer-to-peer learning resource [here](#).
