

ONCOLOGY CARE MODEL COLLABORATIVE WORKSHOP

The ACCC Oncology Care Model Collaborative Workshop is an exclusive bi-annual event for cancer care professionals who participate in the Oncology Care Model (OCM).

This year's Workshop featured snapshot presentations by OCM practices with take-home strategies, workgroups on hot-button topics, facilitated Q&A sessions, networking with OCM peers, and relationship building with CMMI.

As with prior ACCC Oncology Care Model Collaborative Workshops, the opportunity to meet individuals participating in the OCM across the nation and share our collective experiences has been invaluable.
