PYA P.C., Moss Adams *(Confirmed as of 1/10/2022)*

ACCC Continues to Monitor COVID-19

The Association of Community Cancer Centers (ACCC) would like to reaffirm its commitment to the health and safety of our guests and the patients that you serve. Current local guidelines indicate that all persons over twelve years old must display proof of vaccination against COVID-19 before entry to meeting establishments, including hotel common rooms, banquet halls, conference centers, meeting facilities, convention centers, auditoriums, and shared work facilities. Therefore, all AMCCBS attendees must show proof of full vaccination and photo ID upon arrival. We will continue to update this guidance as things change.

With numerous opportunities to **COLLABORATE**, **GROW**, and **TRANSFORM**, AMCCBS will examine some of the most important topics in oncology through two session tracks, keynotes, and luncheons that explore strategies for bringing more cost-effective cancer delivery to your program or practice, new treatments and technologies, and the latest public policy changes that will affect your livelihood. Experience sessions like:

- How to Evaluate the Impact of Cancer Programs and Clinical Services
- Prior Authorization: How the Sausage is Made
- Industry Reconfiguration: Who's the Boss?
- Precision Medicine vs. Value-Based Payment
- Rethinking Survivorship Care

AGENDA AT-A-GLANCE

WEDNESDAY, MARCH 2

- 7:00 AM - 4:00 PM** ACCC Capitol Hill Day
(Exclusive to ACCC members on the cancer care team.) *R
- 3:00 - 6:00 PM** Registration/Customer Service Desk Open

MARCH 3 KEYNOTE

(Over)-Paying for Cancer Care

Cary Gross, MD, Professor of Medicine and Director of the Cancer Outcomes Public Policy and Effectiveness Research (COPPER) Center, *Yale School of Medicine*; co-author, *A New Deal for Cancer Care: Lessons From a 50 Year War*

Learn how the rise in cancer costs is attributable to a “cancer cost trifecta”—more cancers are being diagnosed, a higher utilization of cancer-related care, and the availability of more expensive testing and treatment options. Hear how a range of policy initiatives and reforms could help realign the interests of scientists, providers, policy makers, and industry in order to prioritize patients and the public and reduce cancer costs. These include ramping up tobacco control efforts, supporting evidence-based screening and prevention strategies, and using payment reform to encourage high-value care.

MARCH 4 KEYNOTE

Deconstructing the Value Equation

Harlan Levine, MD, President, Strategy and Business Ventures, *City of Hope National Medical Center*

Cancer care is a complex—and often controversial—topic, with multiple stakeholders that view “value” through many different lenses. Hear what value in cancer care means to patients and their caregivers and how this meaning is usually different for payers and employers. Then consider how we define value in oncology reflects on us as a society. Strategize how these different perspectives fit together to yield a value equation that considers outcomes, patient experience, cost, and time. Learn about the role you can play in defining oncology value going forward, and in so doing, help drive to a better—and more equitable—cancer care delivery system.
