

ASSOCIATION OF COMMUNITY CANCER CENTERS

JOIN US!

TOGETHER
— WE ARE —
STRONGER

Cancer Program Administrator. Oncologist. Nurse. Pharmacist. Registrar. Social Worker. Financial Advocate. Hospital Executive.

Cancer care is a team effort. The Association of Community Cancer Centers (ACCC) provides a multidisciplinary, how-to perspective to help you and your team provide exceptional patient care. **Together we are stronger.**

ACCC is a powerful network of more than **23,000** multidisciplinary practitioners and **2,500** cancer programs and practices nationwide.

ACCC represents cancer care professionals from every discipline in oncology—working in every care delivery setting. From private practices to hospital-based cancer programs, large healthcare systems, and major academic centers, ACCC members address the most critical issues in quality cancer care delivery.

Online and print resources focus on topics such as patient-centered care, staffing, strategic planning, precision medicine, practice improvement, immunotherapy, molecular testing, specialty pharmacy, oral oncolytics, and more.

Together We Are Advancing Quality Care

ACCC quality improvement initiatives address gaps in care delivery and coordination, help translate cutting-edge information into real-world practice, and optimize patient outcomes.

- How-to resources are informed by the challenges and successes of our members, and aim to make care accessible, coordinated, cost-effective, and evidence-based.
- Learn how cancer programs control costs, implement new standards, and launch innovative organizational strategies.
- New approaches to business, policy, economic, and reimbursement challenges for measurable results.

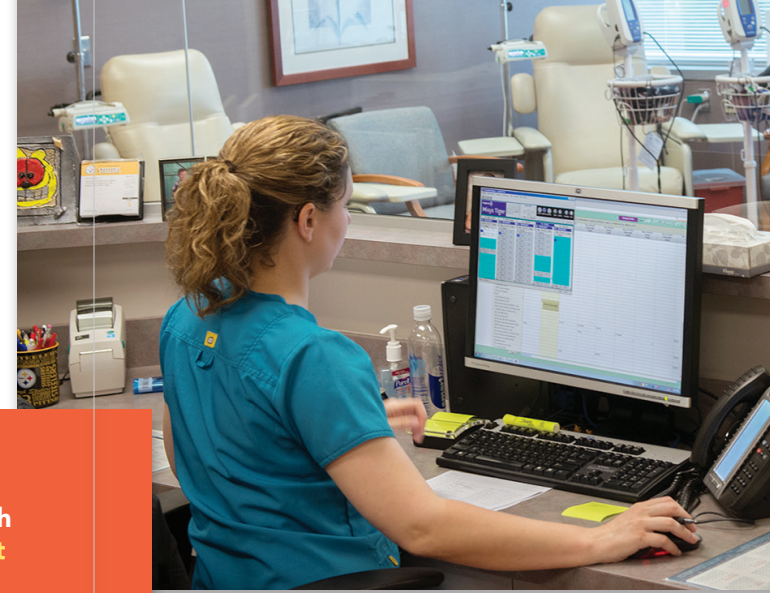

Together We Are Improving the Patient Experience

ACCC develops cost-effective and replicable tools to help members integrate and grow services that support the physical, psychosocial, and financial well-being.

- The ACCC Financial Advocacy Network and the online Boot Camp offer dynamic resources to support cancer patients and address potential barriers to care created by costs.
- Effective practices on supportive care, distress screening, and care coordination offer actionable information for enhancing patient-centered care.
- Process improvement initiatives provide step-by-step strategies for efficient integration of treatment advances into your practice or program.

"I attend ACCC conferences for my professional development. There is so much changing in the oncology world—and I get the best information from ACCC."

Laurie Tyer, MSN, RN
The Lahey Center for Oncology and Hematology at Parkland Medical Center

Together We Are Preparing for the Future

ACCC provides the information and support our members need not just to survive—but to thrive—in a complex and ever-changing healthcare delivery system.

- From the state to national level, ACCC lobbies on issues impacting oncology and represents members in federal agencies and the White House. Our Capitol Hill Day enables members to advocate for access to affordable care.
- The ACCC Institute for Clinical Immuno-Oncology (ICLIO) is the only comprehensive initiative to prepare multidisciplinary cancer care providers for the complex implementation of immuno-oncology in the community setting.
- The Oncology Pharmacy Education Network (OPEN) offers tools for clinical and operational success.
- Oncology Care Model (OCM)—participating practices can join the ACCC OCM Collaborative for valuable, peer-to-peer learning, insights from thought leaders, and access to effective practices for implementing OCM requirements.
- ACCC programs address trends such as *The Future of Patient-Centered Care and Envisioning Next Gen Multidisciplinary Cancer Care*.

Join ACCC and EVERY member of your team will receive practical, problem-solving resources and professional development opportunities to elevate care delivery, coordination, and the patient experience across your organization.

Tap Into the Value of ACCC Membership

Enjoy significant savings when you join ACCC as a Cancer Program Member. EVERYONE on your cancer care team—no matter what discipline—will gain access to valuable resources for only \$1,200/year. Whether you have a team of 10, 50, or 100 professionals, everyone can benefit from the vast tools that ACCC delivers.

The insights and experiences shared through the members-only online community and at live-learning events provide ideas, connections, and inspiration you can't get anywhere else.

Earn Free Meeting Registration! First-time members receive one free registration to the Annual Meeting or National Oncology Conference—a \$650 value! That's half the cost of your first year of membership.

Join today. Visit acc-cancer.org/membership for a full list of benefits.

ACCC is a community of cancer centers. We invite you and your cancer program to become part of our community.

The Association of Community Cancer Centers (ACCC) is the leading education and advocacy organization for the multidisciplinary cancer team.

Founded in 1974, ACCC promotes the entire continuum of quality cancer care for our members and the patients they serve in communities nationwide. Our multidisciplinary approach is reflected in our leadership structure, national and regional meetings, bi-monthly *Oncology Issues* journal, e-newsletters, white papers, elearning modules, and webinars.

It is estimated that 65% of the nation's cancer patients are treated by a member of ACCC.
