Seeing Beyond Age in the Management of Lung Cancer

This CME activity is intended for oncologists, nurses, and other health-care professionals who provide care to older patients with advanced non-small cell lung cancer (NSCLC). The goal of this activity is to discuss and evaluate the latest advances in the care of older patients diagnosed with advanced NSCLC. This activity is supported by independent education grants from Lilly USA, LLC, Celgene, and Genentech.

Monitoring Milestones in Patients with CML

This CME activity is intended for hematologists and oncologists involved in the diagnosis of chronic myeloid leukemia (CML) and the treatment and management of patients with this disease. This activity is designed to improve clinicians' ability to apply evidence-based guidelines and data to stratify, treat, and manage patients with CML and to assess response to treatment. This activity is supported by an independent education grant from Novartis.
