AI's Role in Advancing Cancer Prevention: Detection, Diagnosis, Treatment, and Precision Medicine

AI tools power business intelligence platforms and software that streamline operational functions, including scheduling, virtual visits, and safety and quality processes. AI-driven cancer research is helping to achieve the precision medicine goal: targeting the right treatment to the right patient at the right time.

THE 13TH ANNUAL ACCC INNOVATOR AWARDS

Recognize VISIONARY and COMPELLING
Ideas in Oncology from ACCC Cancer Program
Members Nationwide

SUBMISSION DEADLINE DATE: February 21, 2023

Innovations should advance the goals of improving access, quality, and value in cancer care delivery.

SUGGESTED AREAS OF FOCUS INCLUDE:

- Community outreach, prevention, and screening
- Telehealth, virtual care models, and digital tools
- Artificial and business intelligence solutions
- Community research programs
- Health equity, diversity, and inclusion programs
- Operational and financial initiatives
- Interdisciplinary partnerships in care coordination
- Patient-centered care and supportive services
- Precision medicine implementation
- Quality and process improvement and monitoring
- Retention and recruitment strategies

Winners will present their innovations at the ACCC 40th National Oncology Conference, October 4–6, 2023, in Austin, TX, be featured in our peer-reviewed journal, *Oncology Issues*, and receive exposure through national media outlets.
