

Jason J. Luke, M.D., F.A.C.P. is an Assistant Professor of Medicine at the University of Chicago where he specializes in the management of patients with melanoma and early phase drug development. Dr. Luke received his M.D. from Rosalind Franklin University of Medicine and Science in Chicago. He then pursued internship and residency at the Boston University Medical Center followed by medicine and medical oncology fellowships at Weill Cornell Medical College and Memorial Sloan-Kettering Cancer Center in New York City. Following fellowship, Dr. Luke was a tenure-track, Type 1 Instructor in Medicine at Harvard Medical School as well as Staff Physician at the Dana-Farber Cancer Institute and Brigham and Women's Hospital. Dr. Luke was then recruited to the University of Chicago to develop a comprehensive melanoma research program and bolster investigation into early drug development of immunotherapeutics. Dr. Luke is actively involved in several profession societies including the Society for Melanoma Research, the Society for Immunotherapy of Cancer and the American Society for Clinical Oncology (ASCO). In 2014, Dr. Luke served as the chair of the education committee and as a member of the scientific committee for the melanoma track of the ASCO annual meeting. Dr. Luke has received several awards including a Young Investigator Award from the Conquer Cancer Foundation of the ASCO, an ASCO Merit Award, the Denise and Michael Kellen Young Investigator Award from the Melanoma Research Alliance and a Paul Calabresi Career Development in Clinical Oncology Award (K12). Dr. Luke's research has been supported by ASCO, the National Comprehensive Cancer Network and the National Cancer Institute.
