

2023 SCOS Annual Conference

August 4-5th, 2023 | Wild Dunes Resort Isle of Palms, SC

Make Your Case

Show your supervisor the value of attending!

Dear

I would like to attend the South Carolina Oncology Society (SCOS) 2023 Annual Conference taking place August 4-5, 2023. This conference offers a valuable opportunity to engage with peers, enhance our knowledge in cancer care, and collaborate with fellow professionals.

The SCOS Annual Conference not only provides exceptional professional development but also takes place in the beautiful setting of the Wild Dunes Resort, offering a perfect balance of education and enjoyable activities suitable for families as well.

By attending this conference, I believe our organization will benefit in several ways:

- Acquiring updates on the latest advancements in cancer care, particularly in breast, lung, and colon cancers, enabling us to provide improved patient care
- Gaining insights into the intersection of long COVID and cancer, allowing us to better understand and address potential implications for our patients
- Staying informed about South Carolina healthcare policies and their potential impact on patient access to treatment and our practice
- The conference's schedule is thoughtfully designed to maximize our time and resources, providing a comprehensive program over the course of two days

Should you have any questions or require further information about the conference, please feel free to reach out to the **Meetings Department**.

For assistance with my registration as a healthcare provider, please contact Amanda Impellizzeri, Leadership Relations Manager, at aimpellizzeri@acc-cancer.org.

For any inquiries regarding industry registration, kindly reach out to our **Corporate Relations** department.

I would like to highlight that healthcare provider registration is complimentary for this event.

Thank you for considering my request. Your support in attending the SCOS Annual Conference would greatly contribute to my professional growth and enable us to stay at the forefront of cancer care.

Sincerely,
